Brief description of filing. (If filing follows rates of an advisory organization, specify organization):

With this filing, we are updating our Drive Safe and Save Index model. The variable definitions for acceleration, deceleration, left turns, and right turns have been revised and the coefficients of the model were refit using the driving data we have collected since introducing this program on September 5, 2011. As we are doing with this filing, we plan to periodically update the model to keep it in tune with the driving data being collected.

The revised model will be effective April 30, 2012 for new and renewal business (June 9, 2012 and later for renewal business subject to advance billing requirements). We estimate a negligible overall rate impact as a result of this revision.

The rate manual accompanying this filing has been updated to include the model changes and can be found on pages 520-523.

\* Adjusted to reflect all prior rate changes.

\*\* Change in Company's premium level which will result from application of new rates.
